Nihesh Rachakonda

AI Engineer
niheshr03@gmail.com
Portfolio | **GitHub** | **LinkedIn** | **LeetCode** | **Codeforces**

Full stack engineering intern who ships web applications end to end: React and Next.js frontends, REST backends in NestJS, Express, and FastAPI, and both SQL and NoSQL data layers. Programs in Java, JavaScript / TypeScript, Python, and C++, with strong data structures and algorithms (LeetCode 1824, Codeforces 1208). National hackathon winner who debugs and optimizes high-volume services from logs, tests, and latency metrics.

Education

VNR Vignana Jyothi Institute of Technology
B.Tech in Information Technology — 2023 – 2027 — *CGPA: 9.16 / 10*

Experience

Dattam Labs | Software Engineer Intern — Aug 2025 – Apr 2026

- Owned the frontend of **Assetly**, a platform for managing property assets, payments, subscriptions, and document services, building it in Next.js against a NestJS REST backend on PostgreSQL.
- Shipped **AccessLife** with senior engineers: a cross-platform Expo (React Native) app live on both app stores over a FastAPI service on Azure VMs serving US school districts, plus CI/CD across Azure and AWS.
- Built the high-volume data pipelines powering **AeroLeads** from the ground up (AWS Lambda, SQS queuing, Elasticsearch indexing and querying), with logging and monitoring to troubleshoot failures at scale.

Skills

Languages: Java, JavaScript / TypeScript, Python, C++, SQL
Frontend: React, Next.js, React Native (Expo), Tailwind CSS, Zustand
Backend: NestJS, Express, FastAPI, REST API design, JWT / OAuth, WebSockets, microservices
Databases: PostgreSQL, MySQL, MongoDB, Redis, Neo4j, Elasticsearch
Testing & Tools: Git, Jest, pytest, Docker, CI/CD (GitHub Actions), AWS, Azure, Linux, Agile
AI: LLM orchestration, RAG pipelines, AI agents, LangChain

Projects

GST Reconciliation Engine (Graph-Based Fraud Detection) — GitHub
Next.js, TypeScript, Python, FastAPI, Neo4j, Docker | 2026

- Designed and built a tax-reconciliation product that models filings as a Neo4j graph to flag mismatches and detect circular-trading fraud through cycle detection. Serves a Next.js dashboard from 17+ REST endpoints with an AI assistant grounded in the graph. Won the National ACM-KLH HackWithAI 2026.

Second Brain (Full Stack Knowledge Platform) — Live
Next.js, TypeScript, Prisma, PostgreSQL, NextAuth | 2026

- Built a live note and bookmark platform end to end: a Next.js App Router frontend with an interactive React Flow graph over a Prisma and PostgreSQL data layer, session auth with NextAuth, and REST routes that summarize, auto-tag, and answer questions across saved items with cited sources.

Open Source

- Merged PRs to **IINA**, the macOS media player, and **DefinitelyTyped**, the TypeScript type definitions repo
- **AWS Open Data**: contributed scraping, S3 sync and Parquet pipelines to the Indian Supreme, High and District Court judgment datasets
- Hacktoberfest 2024 Level-4

Achievements & Certifications

- Winner, GDG TechSprint 2026: **Civic Lemma**, a full stack civic platform (Next.js, Express, FastAPI)
- Winner, AI Week Vibe Coding 2026: **SEFS**, a smart file organizer with a RAG chatbot
- Research Paper: Model Selection via Hypothesis Testing | IJFMR | Cert: Meta MySQL (Coursera)
