

# NIHESH RACHAKONDA

Software Engineer

niheshrachakonda@gmail.com | +91 8328094810

Portfolio | GitHub | LinkedIn | LeetCode

Software engineer with production experience building scalable backend systems, cloud-deployed applications, and Big Data pipelines. Proficient in Python, Java, Go, and C++ with strong problem-solving ability (LeetCode 1824, Codeforces 1208). National-level hackathon winner experienced in writing secure, high-quality code across the SDLC, with hands-on exposure to CI/CD, agile methodologies, and collaborative team environments.

## EDUCATION

|                                                                                                          |                                     |
|----------------------------------------------------------------------------------------------------------|-------------------------------------|
| <b>VNR Vignana Jyothi Institute of Technology</b><br>B.Tech in Information Technology<br>CGPA: 9.16 / 10 | Hyderabad, Telangana<br>2023 – 2027 |
| <b>Sri Chaitanya Junior College</b><br>Intermediate (MPC)<br>Percentage: 96.7%                           | Hyderabad, Telangana<br>2021 – 2023 |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                 |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| <b>Dattam Labs   Software Engineer Intern</b><br>• Engineered high-throughput <b>Big Data</b> pipelines for <b>AeroLeads</b> using <b>AWS Lambda</b> (1000+ concurrent executions), <b>SQS</b> , and <b>Elasticsearch</b> ; built <b>AccessLife</b> , a cross-platform mobile app (Expo) with a <b>FastAPI</b> backend on <b>Azure VMs</b> serving 8–9 US school districts; owned <b>CI/CD pipelines</b> automating deployments across Azure and AWS, reducing manual toil in the <b>SDLC</b> within a <b>collaborative, agile</b> team. | Hyderabad   Aug 2025 – Mar 2026 |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|

## SKILLS

|                  |                                                                                     |
|------------------|-------------------------------------------------------------------------------------|
| Languages:       | <b>Java, Python, C++, Go</b> , JavaScript, TypeScript, C, SQL                       |
| Frameworks:      | React, Next.js, Node.js, Express, NestJS, FastAPI, Expo (React Native)              |
| Cloud & DevOps:  | <b>AWS</b> (Lambda, SQS, S3, EC2), <b>Azure</b> (VMs), <b>Docker</b> , CI/CD, Linux |
| Databases:       | <b>PostgreSQL</b> , MySQL, MongoDB, SQLite, <b>Elasticsearch</b> , Neo4j            |
| Data & AI:       | RAG pipelines, Vector search, Knowledge Graphs, OpenAI APIs                         |
| Tools & Methods: | Git, Agile/Scrum, VS Code, GitHub Actions                                           |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                             |                           |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| <b>GST Reconciliation Platform</b><br>• Built an intelligent <b>GST reconciliation system</b> using <b>knowledge graphs</b> (Neo4j) to detect <b>circular trading patterns</b> and assess <b>vendor risk scores</b> , with an AI chatbot for natural-language financial queries.                                            | TypeScript, Neo4j, Python |
| <b>NowBind   nowbind.com   Open source</b><br>• Developing an open-source publishing platform with a <b>Go backend</b> and <b>MCP/agent routes</b> for AI agents to programmatically consume and publish content, designed for the agentic web.                                                                             | Next.js, Go               |
| <b>Indian Court Judgements   GitHub</b><br>• Open-source contributor to Vanga’s project scraping and archiving <b>Supreme Court, High Court, and District Court</b> eCourts data into <b>AWS S3</b> for public access; operates under the <b>AWS Open Data Program</b> , making judicial records freely available at scale. | Python, AWS S3, EC2       |

## CERTIFICATIONS & ACHIEVEMENTS

- **ACM-KLH HackWithAI 2026** (National) – GST Reconciliation Platform – Won **INR 50,000**
- **AI Week Vibe Coding Hackathon 2026** (Winner) – SEFS: Smart file organizer with RAG chatbot
- **GDG TechSprint 2026** (Winner) – Civic Lemma: AI-powered civic grievance platform
- **Research Paper:** Testing of Hypothesis for Model Selection – **IJFMR**
- Database Structures and Management with MySQL – **Meta (Coursera)**
- Hacktoberfest Level-4 Contributor – **Hacktoberfest 2024**
